Forward looking statements

- It should be noted that certain statements herein which are not historical facts, including, without limitation, those regarding expectations for general economic development and the market situation, expectations for customer industry profitability and investment willingness, expectations for company growth, development and profitability and the realization of synergy benefits and cost savings, and statements preceded by "expects", "estimates", "forecasts" or similar expressions, are forward-looking statements. These statements are based on current decisions and plans and currently known factors. They involve risks and uncertainties which may cause the actual results to materially differ from the results currently expected by the company.
- Such factors include, but are not limited to:
 - (1) general economic conditions, including fluctuations in exchange rates and interest levels which influence the operating environment and profitability of customers and thereby the orders received by the company and their margins
 - (2) the competitive situation, especially significant technological solutions developed by competitors
 - (3) the company's own operating conditions, such as the success of production, product development and project management and their continuous development and improvement
 - (4) the success of pending and future acquisitions and restructuring.

Short-term risks of business operations

- Significance of China as the primary market for new paper and board machines has increased
- Rapid changes in Chinese demand may have negative impact on Metso Paper
 - ➔ development of aftermarket and flexible supply chain
- Delivery times have lengthened
 - Material and other costs may rise during the extended delivery time and impact our profitability
 - Scarcity of certain components and subcontractor resources may lengthen delivery times
 - ➔ exact delivery terms, hedging of key raw materials and flexible supply chain

15

Short-term financial outlook

- Metso's financial performance for the rest of 2007 is estimated to be stronger than in the first quarter.
- 2007 net sales are estimated to grow by more than 20% on 2006 and the operating profit is estimated to clearly improve.
- 2007 operating profit margin is estimated to be slightly below Metso's target, which is over 10%.

The estimates concerning Metso's financial performance are based on Metso's current structure, order backlog and market outlook.

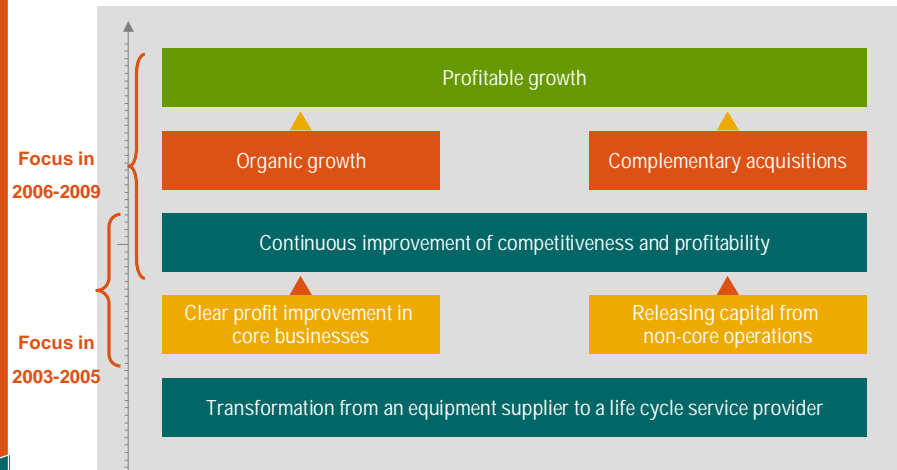

17

Focus areas in 2007

From restructuring to profitable growth

19

© Metso Corporation 2007 11.06.2007

Operational excellence to boost profitability

All Metso businesses continue to have a lot of opportunities to boost profitability

- Consistent productivity improvement of 4-6%/a
- Quality costs down, especially in Metso Paper
- Global sourcing
- Global business processes and way to operate

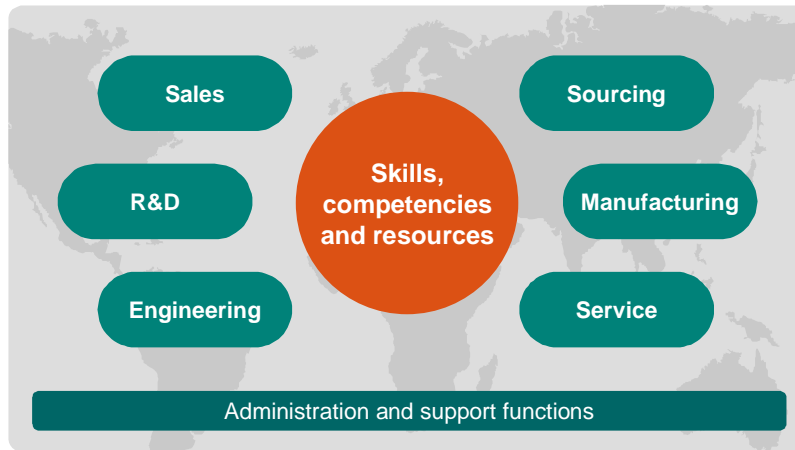

20

© Metso Corporation 2007 11.06.2007

More global footprint throughout the value chain

21

© Metso Corporation 2007 11.06.2007

Strengthening global delivery capability

Metso Paper

- Expansion of paper roll manufacturing in Jyväskylä, Finland (operational in Q3/07)
- Paper machinery facility in Shanghai, China (operational since 2006)
- Expansion of service center in Wuxi, China (operational in Q3/07)
- Service center in Guangzhou, China (operational in 2008)

Metso Minerals

- Expansion of mobile crushing production in Tampere, Finland (operational since Q2/07)
- Start of track mounted crushing equipment manufacturing in the United States (operational since 2006)
- More than doubling of manufacturing and foundry capacity in India (operational since 2006)

Metso Automation

- Expansion of valve production in Shanghai, China (ongoing)

22

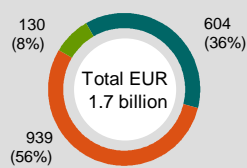

© Metso Corporation 2007 11.06.2007

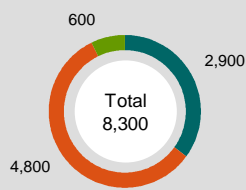

Growth and earnings stability through aftermarket business

- Both technology and service orientation needed in Metso
 - More management focus, especially in Europe and North America
 - Stronger status of aftermarket
 - Best competencies to develop business models in service
- New service products and business models
 - Full utilization of large installed base
- Enhanced wear part and consumables offering
- Acquisitions to accelerate growth in aftermarket

Metso aftermarket net sales growth 10% on 2005.

Metso's aftermarket personnel

Metso aftermarket offering

● Metso Paper ● Metso Minerals ● Metso Automation

23

© Metso Corporation 2007 11.06.2007

Growth through acquisitions

Metso Acquisition Process

- Bulk Equipment Systems and Technologies Inc., (March 2007)
- Aker Kvaerner Pulping & Power (December 2006)
- Svensk Gruvteknik AB and Svensk Pappersteknik AB (October 2006)
- Shanghai-Chenming Paper Machinery Co. Ltd (September 2006)
- Texas Shredder, Inc. (August 2005)

2005

2006

2007

2008

Strategic Fit

- Complement product/service offering
- Stronger presence in emerging markets
- Aftermarket potential
- Closing geographical gaps

Financial Fit

- Target business to be shortly earnings-enhancing

Feasibility

- Availability
- Anti-trust requirements
- Environmental liabilities
- Unusual risks

24

© Metso Corporation 2007 11.06.2007

Metso's power opportunity

- Metso Power is a forerunner in fluidized bed combustion of biomass, coal and other fuels to power plants and a global leader in chemical recovery systems to pulp and paper mills
- The products are fluidized bed boilers and recovery boilers, oil and gas boilers, evaporators, environmental systems and services
- Environmentally sound, biomass and waste based power generation solutions provide exiting new growth opportunities for Metso

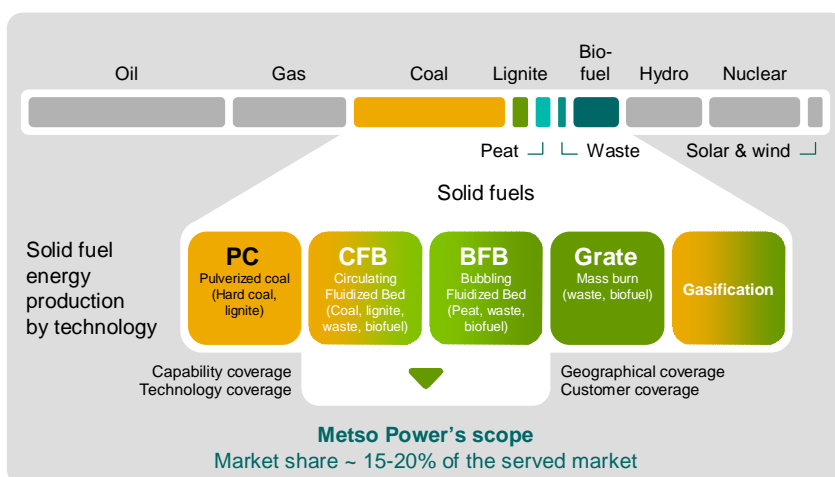

25

© Metso Corporation 2007 11.06.2007

Metso Power's focus

World's electricity production capacity by fuels

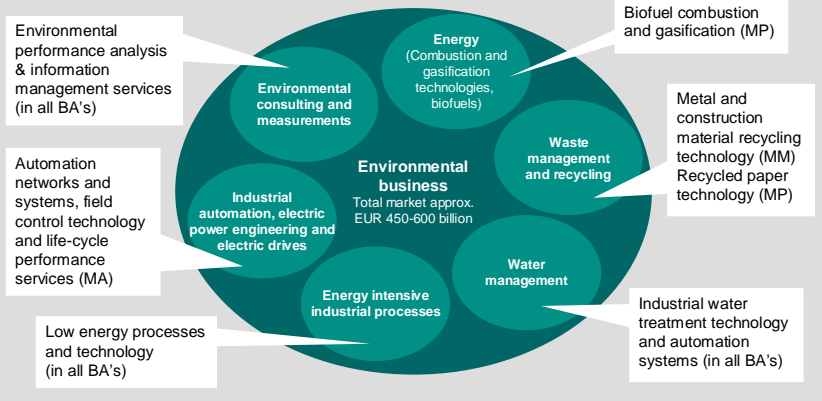

26

© Metso Corporation 2007 11.06.2007

Metso as a supplier of environmental technology

Using the OECD definition about 50% of our net sales can be classified as environmental business^{*)}

*) Analysis of environmental business based on the OECD definition is ongoing in Metso. Given number is an estimate.

© Metso Corporation 2007 11.06.2007

27

Profitable growth continues

- Metso Minerals, Metso Automation and Metso Power; exploit organic growth opportunities in full
- Metso Paper
 - Operational issues to boost profitability
 - Successful integration of Pulping and Power
- Sustainability of profits over business cycle
- Complementary acquisitions
- Power, biomaterials refining and environmental technology as new longer-term opportunities

Markets for pulp and paper

Pulp segment	Business environment
<ul style="list-style-type: none"> Mechanical and chemical pulp producers 	<ul style="list-style-type: none"> Satisfactory demand Europe and US rebuild and aftermarket. Drivers: Production is shifting towards Southern Hemisphere where planted hardwood is used as raw material. Customers work for enhanced operational efficiency and are outsourcing services. Trend towards complete and large scale mill deliveries. Use of recycled fiber will continue to grow.
Paper and board segment	Business environment
<ul style="list-style-type: none"> Paper, tissue and board producers 	<ul style="list-style-type: none"> Satisfactory demand Europe and US rebuild and aftermarket. Drivers: Growing paper consumption attracts new investments to China and rest of South-East Asia. Aging of existing machinery drive for process improvements and process automation investments in Europe and North America. Customers work for enhanced operational efficiency and are outsourcing services.

34

Markets for construction, mining and metal recycling

Construction segment	Business environment
<ul style="list-style-type: none"> Quarries and crushing projects Contractors Engineering and consulting companies 	<ul style="list-style-type: none"> Excellent demand. Drivers: Active road network and infrastructure development boost aggregates prices and demand. Customers are outsourcing services. Trend towards mobile solutions.
Mining segment	Business environment
<ul style="list-style-type: none"> Mining and industrial minerals companies Mining contractors Engineering and consulting companies 	<ul style="list-style-type: none"> Excellent demand. Drivers: Emerging economies and high metal prices drive extensive investments. Customers are outsourcing services and consolidating. Trend towards larger equipment and projects.
Metal recycling segment	Business environment
<ul style="list-style-type: none"> Metal recycling industry 	<ul style="list-style-type: none"> Excellent demand. Drivers: High commodity demand accelerates scrap demand. Mining boom and high metal prices. Customers are consolidating.

35

© Metso Corporation 2007 11.06.2007

Markets for power, oil and gas

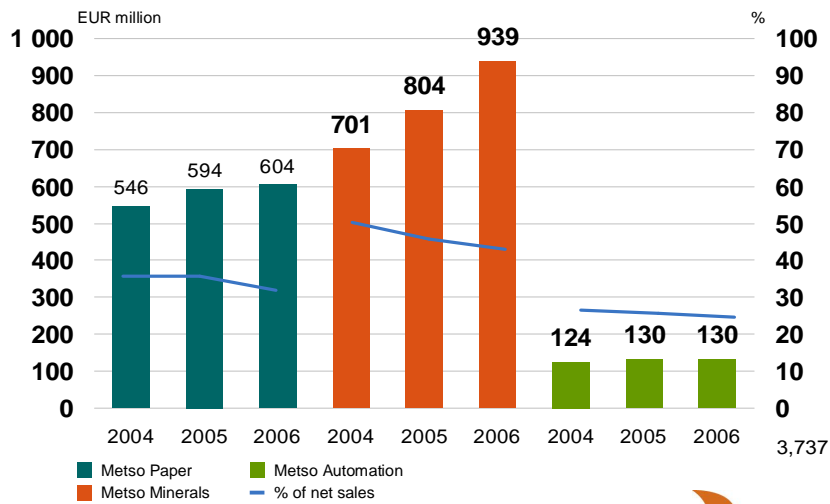

Power generation	Business environment
<ul style="list-style-type: none"> Power plants: coal fired, industrial, combined cycle, energy from waste Engineering firms and construction companies Automation integrators Chemical industry Oil & Gas industry 	<ul style="list-style-type: none"> Strong demand Drivers: Growing energy consumption and high prices drive for new plant investments and improvements at the existing plants. Customers work for enhanced operational efficiency are outsourcing services. Trend towards global deregulation opens competition and privatization as well as increased requirements for safety and environment.
Oil & gas upstream	Business environment
<ul style="list-style-type: none"> Oil & gas industry Refineries 	<ul style="list-style-type: none"> Strong demand Drivers: High prices and increased consumption keep investments at a high level. Customers are globalizing and outsourcing services. Trend towards increased requirements for safety and environment.

36

Aftermarket business continues to provide opportunities

37

© Metso Corporation 2007 11.06.2007

Balance sheet structure 31.3.2007

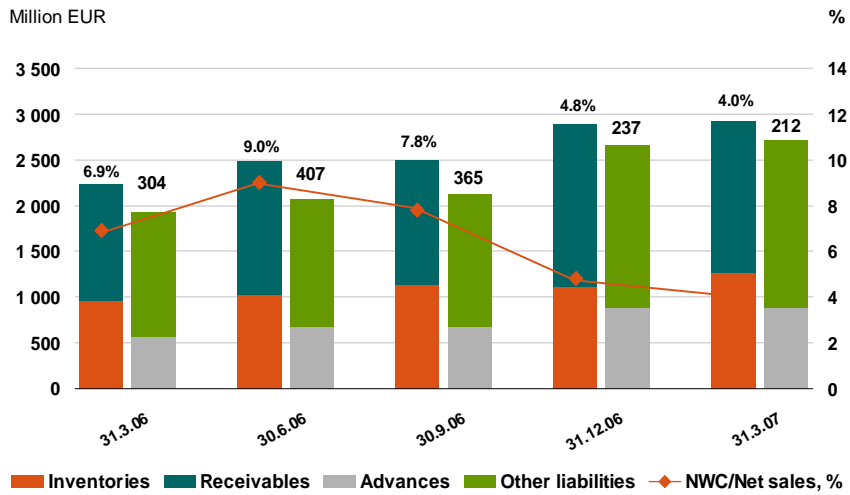

- NWC: Net working capital EUR 212 million, decrease of EUR 92 million from March 2006
- NIBL: Net interest bearing liabilities were EUR 353 million and gearing 22.9%

38

© Metso Corporation 2007 11.06.2007

Net working capital development

39

© Metso Corporation 2007 11.06.2007

Gross capital expenditure including acquisition

40

© Metso Corporation 2007 11.06.2007

Other issues

- Raw material prices
 - Majority of price increases passed through to end-product prices
 - Long-term contracts with key suppliers
 - In Q1/07 Metso Paper's and Metso Automation's operating profit was negatively affected by a steep increase in the price of stainless steel, a key raw material for components
- Exchange rates
 - main currencies in addition to EUR: USD, BRL, SEK, CAD
- Tax rate
 - 2007: estimated to be about 30%
