

Crusher wear parts Metso O-Series

Application

Metso Nordberg® HP™, C Series™ Jaw crushers
and GP™ crushers

Crusher wear parts with the right balance between performance, reliability and affordability

Read more at:

The quality of the wear parts dictates the end result and choosing the right crusher wears is important, therefore Metso has carefully developed the O-series crusher wears, to keep you in control of your operation at an affordable cost, still with Metso quality.

Performance

By purchasing from the original manufacturer, you are assured of getting wear parts made to current specifications and critical tolerances. Our competitors are forced to make their imitation parts through reverse engineering using guesswork to determine acceptable deviations.

Reliability

In the aggregates and mining industry, the quality of the wear parts dictates the end result. With Metso O-series, you get your crusher wear parts from one reliable source. Our extensive O-series are specifically designed and perfected for Metso crushers. Rest assured, Metso has what you need to keep your process up and running.

High-quality wear parts where and when you need them

To stay ahead of the competition your equipment must run efficiently. Getting the wear parts you need on time is essential to avoiding costly downtime, with strategically located distribution centers and distributors world-wide, our wear parts are readily available when you need them.

When safety matters

Using the appropriate lifting tool for a specific wear part is crucial. When installing Metso crusher wears, our specially designed lifting tool can be used. These tools, designed for Metso crusher wears only, improve working conditions and make it possible to carry out installations quickly and efficiently, without compromising safety.

Benefits:

- Metso quality at an affordable price
- Designed and perfected for Metso crushers
- Specially designed, fit-for-purpose tools for safe installation and maintenance
- High availability and support worldwide
