

Metso

X-Series third-party crusher wears

Performance with precision

Precision-engineered parts from a reliable supplier

Mining and aggregates customers can reach optimal crusher performance with the help of Metso's in-depth knowledge in the crusher dynamics and foundry process. With the Metso X-Series crusher wears, our commitment extends to third-party crushers, adhering to the OEM standards, at a competitive price.

Chamber selection plays a significant role in your site's performance due to its influence on the end-product quality and overall uptime. In aggregates and mining, Metso emerges as your singular, reliable supplier for all critical crusher parts. Meticulously perfected for third-party brand crushers, the Metso X-Series wear parts fit and function seamlessly with the crusher.

Furthermore, X-Series integrates with Metso Contender™ Series spare parts, and you can trust Metso to provide the comprehensive solution required to keep your operations running smoothly.

Benefits

- Metso quality wear parts that meet OEM standards
- Backed by Metso warranty
- Fast access to wear parts through Metso distribution network and direct sales

Adhering to the OEM standards

Metso X-Series wear parts are designed to fit and function at the same level as your crusher's OEM wear parts. Metso has the capability to support any crusher brand, including, for example, Sandvik, FLSmidth and Thyssenkrupp crushers.* The offering is continuously developed to serve more crusher brands.

X-Series Standard line

Metso Standard line wear parts meet the industry-standard levels of reliability, lifetime and performance. X-Series Standard line offers a diverse range of wear parts made from Metso XX alloy. They are recommended for all types of applications whether mobile or fixed installations, with various feed materials, and from low to very high annual production volumes.

X-Series Performance line

Metso Performance line wear parts are crafted to fulfill the unique requirements of each customer, utilizing Metso Chamber Optimization service. These wear parts are tailor-made to increase the crusher's capacity, product quality and yield in high-volume, high-value applications. Performance line wear parts feature Metso XT and WX alloys.

Safer handling with Metso lifting tools

Metso X-Series wear parts for third party crushers are complemented with Metso lifting tools, engineered to fit and function with Metso-designed wears and support safer operations, protecting maintenance personnel.

Optimizing maintenance

Metso lifting tools are engineered with quality materials and designed to comply with precise standards and tolerances. Using tools that make crusher maintenance easier and safer can have an impact on plant's availability and productivity.

Benefits:

- Engineered by the OEM crushing experts
- Metso quality and standards
- Safer and faster maintenance
